IWG/AM-25  
Control No. 2064  
3 September 1954

MEMORANDUM FOR: IWG

SUBJECT : IWG Assessment of Intelligence Furnished JOC  
on IL-II Commodity Items

1. The IWG recently recognized the need (refs: IWG/M-62, IWG/M-63, and IWG/M-64) for a permanent record and assessment of the intelligence contributions made to JOC during the security list review. It has been agreed that a list of known contributions would be circulated for assessment as to adequacy of the intelligence.
2. Accordingly, there is attached a list of the JOC documents which incorporate the intelligence contributed to JOC on the commodity items for which quota determinations were recently established by JOC. This group of items has been selected as a convenient starting point; upon completion of the assessment on these items it is anticipated that IWG members will be asked to assist in assessing the adequacy of intelligence on other items considered by COCOM during the security list review.
3. Members are requested to obtain JOC documents as listed in the attached and to furnish them to appropriate analysts in their respective agencies. Such analysts should be asked to provide to their IWG member, any pertinent additional or corrective intelligence and/or an assessment of the adequacy of intelligence in the several JOC documents. This review will provide the basis for a discussion in IWG on 30 September. Requests for additional copies of JOC documents listed in the attached should be directed to the office of Mr. John Garrett, Department of Commerce, Code 164, Extension 4252.
